TECHNOLOGY ABSORPTION AWARD 1998

M/S WALCHANDNAGAR LTD.

M/s Walchandnagar Industries Limited (WIL) a leading private sector industrial firm has made significant contributions in fabrication of special hardware for multiple aerospace and missile applications. Special missile launchers and combustion chambers fabricated based on DRDO designs are outstanding work of technology absorption and realisation. The innovative fabrication techniques and process using special alloys like margarin steel and titanium alloy added to the preformance of the system. This industry situated in a remote place has shown techniques of cost-effective fabrication of high technology products with excellent trained manpower.

In recognition of the outstanding contributions made by the firm in absorbing technology developed by DRDO and productionising, the DRDO confers the 'Technology Absorption Award' to Walchandnagar Industries Limited for the year 1998.

New Delly Date _6 Aug 99
